

Bear-Resistant Products Testing and Certification Program

Interagency Grizzly Bear Committee

CERTIFIED BEAR-RESISTANT PRODUCTS

In order to keep attractants unavailable to bears and reduce human/bear conflicts, regulations pertaining to proper food and attractant storage are likely to be present on public lands within grizzly bear habitat. Use of IGBC-certified bear-resistant containers is one of the methods available to comply with waste containers, dumpsters, enclosures and food storage locker regulations.

The products listed below are those that have been approved by the IGBC as bear-resistant. This means these products meet IGBC bear-resistant design and structural standards, but it is not a guarantee that a grizzly bear cannot gain entry into these products.

Bearicuda Inc. - IGBC Certified Bear Resistant Products
